Policy Document for Alternate sources of energy and energy conservation measures

Energy conservation is the effort to reduce wasteful energy consumption by using fewer energy services. This can be done by using energy more effectively or changing one's behavior to use less service .

Objectives :

▶ To reduce the use of energy and to encourage staff and students to use it efficiently.

▶ To use alternate sources of energy

Implementation process

▶ Use of LED should be increased.

▶ Use of Solar energy should be increased.

▶ Orientation based activities should be organized for the awareness of alternate energy and energy conservation measures.

▶ Use of glass windows for maximum utilization of natural light in college campus buildings.

▶ Lights and fans are switched off when not required.

▶ Air-conditioners are used only at essential places.

▶ Energy efficient compact fluorescent tubes and ceiling fans ,Air conditioners,Refrigerators and other equipments used in the college should be of higher star ratings are used in most of the places to ensure energy conservation .
